Survey Methodology

Period :   November 27- December 01, 2018

Survey Type :   Computer Assisted Telephone Interviews (CATI)

Eligibility :   Age 18+.

Total Respondents :   n = 2,041

Response Rate :   Approximately 56%

Margin of Error :   The confidence interval is not more than ±2.169% at the mid-range with a confidence level of 95%.

- Data was collected by the dedicated team of enumerators of IPOR Consulting Through Computer Assisted Telephonic Interviews (CATI).

- The selection of respondents was made randomly from the phone data-base collected face to face on proportion to population sample (PPS) of adult residents in all four provinces of Pakistan.

- The information in this report has been compiled in accordance with international standards for market and social research methodologies. Figures in charts and tables may not sum to 100 percent due to rounding error.
